## LD-568

### Upper Arm Automatic

- Five language voice prompt
- Voice volume adjustable
- 30 sets of memories
- Average for the last 3 readings
- Automatic power off after 3 minutes of no operation
- Low battery indication

Patent Protection

## LD-578

### Upper Arm Automatic

- 90 sets of memories
- Average for the last 3 readings
- Automatic power off after 3 minutes of no operation
- Erect design makes it easy to read
- One-touch operation

**Clinically Validated According to ESH International Protocol**

## LD-588

### Upper Arm Automatic

- Compact and fluent design
- Large LCD display with bold type
- 2 users with 60 sets of memory each
- WHO (blood pressure classification indication)
- IHB (irregular heart beat) detectable
- Average for the last 3 readings
- Date/Time display
- Low battery indication

## LD-520

### Upper Arm Automatic

- Compact and fluent design
- 90 sets of memories
- Average for the last 3 readings
- Automatic power off after 3 minutes of no operation
- Low battery indication

## LD-750

### Wrist Type

- Large LCD display
- Two users with 90 sets of memory each
- Date & Time display
- WHO blood pressure classification indication
- IHB detectable
- Average for the latest 3 readings
- Automatic power off after 3 minutes of no operation
- Error and low battery indication

*New*

## LD-733

### Wrist Type

- 90 sets of memories
- Average for the last 3 readings
- Automatic power off after 3 minutes of no operation
- Low battery indication
- One-touch operation

## LD-735

### Wrist Type

- 90 sets of memories
- Average for the last 3 readings
- Automatic power off after 3 minutes of no operation
- Low battery indication
- One-touch operation

### LD-728

#### Wrist Type

- Slanted display design against ergonomics
- 90 sets of memories
- Average for the latest 3 readings
- Automatic power off after 3 minutes of no operation
- Low battery indication
- One-touch operation

### LD-732

#### Wrist Type

- Large LCD display with bold type
- Potable and compact design
- 90 sets of memories
- WHO (blood pressure classification indication)
- IHB (irregular heart beat) detectable
- Date/Time display
- Average for the last 3 readings
- Automatic power off after 3 minutes of no operation
- Low battery indication
- One-touch operation

## LD-25

### Mercury Free

- Korotkoff method without mercury
- Manual inflation and deflation
- Simultaneous display of digital and scale makes the readings more precise
- 90° and 100° viewing angle design makes the operation more convenient
- More economy with only AAx2 batteries to be used
- Backlight display
- Automatic power off after 3 minutes of no operation
- Low battery indication

## LD-50

### Automatic Inflatable Handle

- Concise and fluent design
- One-button operation for easy use
- Rechargeable
- Low battery indicator
